MEAN Stack Gateway

- Standard MEAN server-side web api stack running on DB410C
- Sensor, gateway and database all share a single JSON data template based on the model/schema
- Containerized
- Extensible via npm packages

**REST sensor-api (port 3000)**
- post registration
- get config
- get schema
- get time
- post reading

**REST admin-api (port 3001)**
- get registered sensors
- get aggregated data

**Sensor clients**
- temperature
- humidity

**admin http client**
(... and to the cloud)
